

Ahmed Khalil Oueslati

Full-Stack Developer | Java Spring Boot · Angular · Android (Kotlin/Java) | SDET

Porto, Portugal | +351 930 506 667 | oueslati.ahmedkhalil@gmail.com

LinkedIn: [linkedin.com/in/oueslati-ahmed-khalil/](https://www.linkedin.com/in/oueslati-ahmed-khalil/) | GitHub: github.com/AhmedKhalilO

PROFESSIONAL SUMMARY

Full-Stack & Mobile Developer with 6+ years delivering production applications across the complete stack **Java Spring Boot REST APIs, Angular SPAs, and Android native apps (Kotlin & Java)**. Core expertise in microservices architecture, Spring Security / JWT, MySQL / Oracle DB, MVVM, Jetpack Compose, Firebase, Docker, and Jenkins CI/CD. Delivered measurable results in production: **+35% user engagement, -40% loading times, -30% API latency, >95% test coverage**. Strongly focused on code quality and **SDET methodologies**, with hands-on Selenium WebDriver automation (Java) and solid foundations in JUnit 5, Mockito, Jest, and Postman. Currently studying Playwright to enhance end-to-end testing. Bilingual French/English (B2), based in Portugal, immediately available.

TECHNICAL SKILLS

Languages: Java, Kotlin, TypeScript, JavaScript, PHP

Back-End: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST API, GraphQL, JWT, OAuth2, Microservices Architecture

Front-End: Angular, HTML5, CSS3, Bootstrap, Tailwind CSS

Mobile: Android SDK, Kotlin, Java, Jetpack Compose, Jetpack Components, MVVM, MVI, Clean Architecture, Dagger Hilt, Coroutines, Room DB, Retrofit, Firebase, Google Play Console, MDM / Zero Touch Deployment

Testing / SDET: JUnit 5, Mockito, Postman, Selenium WebDriver (Java) (in progress), TestNG (in progress), Playwright (in progress), TDD, API Testing, CI/CD test integration

Databases: MySQL, Oracle DB, Room Persistence Library

DevOps & Tools: Docker, Jenkins, Git, Jira, Swagger, Agile / Scrum

PROFESSIONAL EXPERIENCE

Personal Engineering Project - Banking Solution

Jan 2026 - Present

Full-Stack Developer (Self-initiated)

Portugal

- Designing and developing an end-to-end banking platform: Spring Boot backend services, Angular web interface, and Android mobile application integration.
- Implementing secure REST APIs with JWT authentication and role-based access control (RBAC), applying scalable microservices architecture principles.
- Building and integrating features for secure transactions, authentication flows, and real-time data synchronisation across web and mobile.
- Strengthening software quality engineering practice: Selenium WebDriver test automation (Java), TestNG suite configuration, JUnit 5 + Mockito unit testing, and CI/CD pipeline integration with GitHub Actions.

Tech stack: Java, Spring Boot, Angular, Android (Kotlin/Java), JWT Security, REST APIs, Selenium, TestNG, JUnit, Mockito, Docker, Jenkins, Git, GitHub Actions

Independent Projects (Freelance)

Jul 2025 - Dec 2025

Full-Stack & Mobile Developer

- PadariaApp (AI/Android): Offline-first Android app in Java with Firebase and Room DB. Integrated TensorFlow Lite SVM model for real-time pastry image recognition. Full JUnit 5 test suite with >90% unit coverage.
- YEV App (EV Management): Kotlin + Jetpack Compose smart vehicle app for EV users in Portugal, charging station discovery via OpenChargeMap API, Stripe payment simulation, CI/CD pipeline with automated test gates.

Tech stack: Android (Kotlin, Java), Spring Boot, Firebase, Google Cloud, Room DB, Retrofit, TensorFlow Lite, REST APIs, Jetpack Compose, MVVM, JUnit, Agile/Scrum

TNT

Mar 2024 - Jan 2025

Mobile & Backend Developer

- Developed and maintained HotelTn a hotel booking application, Spring Boot backend with Java/Kotlin, Firebase real-time sync, Android front-end, achieving 35% increase in user engagement.
- Optimised data caching strategy (Room DB, lazy loading), achieved 40% reduction in loading times.
- Collaborated with UI/UX teams on Android and Angular interfaces; enforced code quality via peer reviews and integration testing.
- Participated in Agile sprint planning, peer code reviews, and continuous improvement activities.

Tech stack: Kotlin, Java, Android SDK, Spring Boot, Firebase, REST APIs, MVVM, Retrofit, Angular, Git, Agile/Scrum

Hello Dati

Jul 2019 - Dec 2021 | Jan 2023 - Jan 2024

Software Engineer - Android & Backend

- Architected and maintained 7+ Android applications (2,000+ downloads) using Java & Kotlin, MVVM, Retrofit, LiveData, Data Binding, Dagger Hilt, optimised with coroutine tuning and memory management (~50% lag).
- Built PHP and Spring Boot (REST/GraphQL) backend services, reduced system latency by 30%.
- Managed large-scale deployments to 100+ managed devices via MDM solutions and Google Play Console; collaborated with Ooredoo and Nokia on branded regional mobile apps.
- Conducted UX analysis using Firebase Analytics and Crashlytics, improved user retention by 20%.
- Participated in CI/CD and deployment workflows using Jenkins and Docker.

Tech stack: Java, Kotlin, Android SDK, Spring Boot, PHP, REST APIs, GraphQL, Firebase, MVVM, Retrofit, Oracle DB, Git, microservices, Docker, Jenkins

Frensh Data

Apr 2022 - Nov 2022

Full-Stack Developer - Spring Boot & Angular

- Developed enterprise HRMS web application using Spring Boot (Java) and Angular, handling 3,000+ monthly API requests with >95% service reliability validated via Postman.
- Designed relational data models on Oracle Database, documented all endpoints with Swagger / OpenAPI.
- Integrated HR workflows with LIMS systems; completed 12 validated internal Oracle training modules.
- Participated in CI/CD workflows with Jenkins and Docker within Agile development environment.

Tech stack: Java, Spring Boot, Angular, Oracle DB, REST APIs, Hibernate, Swagger, Postman, Git, Docker, Jenkins, Agile

WonderWork

Feb 2019 - Jun 2019

Mobile Application Developer

- Developed two Android Point-of-Sale apps (merchant & customer) in Java, MVC architecture for local transaction management and loyalty programme tracking.
- Achieved >95% unit test coverage with JUnit, significantly reducing post-launch defects.
- Managed app releases via Google Play Console with 48-hour approval cycles.

Tech stack: Java, Android SDK, MVC, REST APIs, JUnit, Postman, Git

KEY PROJECTS

Banking Solution

Personal Project | Jan 2026 - Present

- End-to-end banking platform: Spring Boot microservices, Angular SPA, Android mobile app. JWT auth, RBAC, secure transactions, real-time data sync. Active Selenium + TestNG automated test suite.

Padaria App

AI-Powered Offline Android Application

- Offline-first bakery product app with real-time pastry recognition via TensorFlow Lite (SVM model). Java, Firebase, Room DB. Full JUnit test suite. [View on GitHub](#)

YEV App

Smart EV Management - Portugal

- EV management app (Kotlin, Jetpack Compose): battery autonomy tracking, OpenChargeMap API, Stripe payment simulation, GitHub Actions CI/CD. [View on GitHub](#)

HotelTn

Cross-Platform Hotel Booking Application

- Real-time hotel booking platform, Spring Boot backend + Android. Push notifications, live sync. +35% engagement, -40% load time in production.

Hospitality Suite

Enterprise Android Launcher - Hotel Devices

- Custom Android Launcher for hotel room devices: Hello Dati Launcher, telephony (Dati Phone), offline navigation, concierge, weather, prayer times. Deployed to 100+ managed devices via MDM. [Watch Video Demonstration](#)

HRMS Platform

Enterprise Web - Spring Boot & Angular

- HR Management System: employee lifecycle, Oracle DB modelling, LIMS integration, Swagger REST API docs. 3,000+ monthly requests in production.

Merchant & Customer POS

Loyalty & Transaction System

- Dual Android app system - 500+ active users. Loyalty management, transaction tracking, >95% unit test coverage. Google Play Console managed.

EDUCATION

Engineering Degree in Software Engineering

2020 - 2024

ESPRIT - École Supérieure Privée d'Ingénierie et de Technologies, Tunisia

Professional Master's - Computer Systems & Network Development

2016 - 2018

ISET Sfax - Institut Supérieur des Études Technologiques de Sfax, Tunisia
